

ε Series "LF"

Description

Compatible adhesive & Operational temperature  
CN-E: - 20~ + 80°C

Operational temperature -20~+80°C  
Temperature compensation range +10~+80°C

| LOW ELASTIC MATERIALS - WOOD, GYPSUM USE                                                                                                                                                                                                                                                                                                        |            |            |                       |         |     |                 |
